

ACKNOWLEDGMENTS

This project would not have been possible without the services provided by the Hagen family in the form of their fishing vessels and the knowledge and experience of those who worked with them. I would particularly like to thank John, Chris and Mic Hagen, Billy McKenzie, Chris 'Stricko' Strikland and Shorty, and Jake Travener for his seamanship and culinary skill. I would also like to thank all those who assisted with the tagging work, especially Jim Higgs and Dave Welch who faired the weather on all five trips. Special mention goes to John Robertson, who left his desk to brave the weather and the fishermen for three of the trips, before being whisked away to higher office. Many thanks to Janine Kuhl who has handled the public return database and reward system at Great Barrier Reef Marine Park Authority and to Bruce Mapstone and Garry Russ for their advice over the course of this project.
