

Science for Management Awards – Previous Recipients

2001

Name	Project Title	University
Severine Thomas	Sediment deposition sensor calibration and field application	James Cook University
Ian Bell	A comparison between movement patterns and diving behaviour of inter-nesting female hawksbill turtles and non-nesting foraging female and male turtles on reefs of the northern GBR	Central Queensland University
Nathan Richards	The Abandoned Ships' Project (ASP) (Eastern Coast Component)	Flinders University
Elizabeth Dinsdale	Evaluating the ecological effectiveness of management strategies to protect fringing coral reefs from anchor damage using outcome-based performance indicators.	James Cook University
Heather Patterson	Isotopes, early life history and potential self-recruitment of coral reef fishes	James Cook University
Amanda Hodgson	The impacts of anthropogenic noise on coastal marine mammals: dugongs and dolphins	James Cook University
Joshua Madin	Ecological implications of hydrodynamic and physical stresses on reef corals	James Cook University
James Aumend	Trace-element analysis of otolith composition as a technique for retrospectively identifying the coastal nurseries of tropical snapper from the GBR	James Cook University
Daniela Lewis	The ecology of territorial herbivorous damselfish and their effect on coral reef benthic communities	James Cook University
