Executive Summary i

About this Report x

Scope of the Outlook Report x

Structure of the Outlook Report xii

Assessment approach xiii

Evidence used xiii

Developing the Outlook Report xiv

1. The Great Barrier Reef 1

1.1 A great Australian icon 2

1.2 Protected as a marine park 3

1.2.1 A multiple use area 3

1.2.2 Marine Park management 3

1.3 Heritage values 4

1.3.1 Significance to Traditional Owners 4

1.3.2 World Heritage 4

1.3.3 National heritage 5

2. Biodiversity 7

2.1 Background 8

2.1.1 Habitats of the Great Barrier Reef 9

2.1.2 Species of the Great Barrier Reef 10

2.2 Current state and trends of habitats to support species 11

2.2.1 Coastal habitats 11

2.2.2 Coral reefs 13

2.2.3 Seabed 17

2.2.4 Open waters 19

2.3 Current state and trends of populations of species and groups of species 19

2.3.1 Plants 19

2.3.2 Corals 20

2.3.3 Other invertebrates 22

2.3.4 Plankton and microbes 22

2.3.5 Fish 22

2.3.6 Marine reptiles 28

2.3.7 Seabirds 29

2.3.8 Marine mammals 30

2.4 Assessment summary - Biodiversity 31

2.4.1 Habitats to support species 31

2.4.2 Populations of species and groups of species 32

2.4.3 Overall summary of biodiversity 33

3. Ecosystem Health 37

3.1 Background 38

3.2 Current state and trends of physical processes 38

3.2.1 Ocean currents 38

3.2.2 Cyclones and wind 39

3.2.3 Freshwater inflow 40

3.2.4	Sedimentation	41
3.2.5	Sea level	42
3.2.6	Sea temperature	42
3.2.7	Light	42
3.3	Current state and trends of chemical processes	43
3.3.1	Nutrient cycling	43
3.3.2	Pesticide accumulation	44
3.3.3	Ocean acidity	44
3.3.4	Ocean salinity	45
3.4	Current state and trends of ecological processes	46
3.4.1	Microbial processes	46
3.4.2	Particle feeding	46
3.4.3	Primary production	47
3.4.4	Herbivory	47
3.4.5	Predation	47
3.4.6	Symbiosis	48
3.4.7	Reef building	49
3.4.8	Competition	50
3.4.9	Connectivity	50
3.5	Current state and trends of outbreaks of disease, introduced species and pest species	51
3.5.1	Outbreaks of disease	51
3.5.2	Outbreaks of crown-of-thorns starfish	52
3.5.3	Introduced species	52
3.5.4	Other outbreaks	52
3.6	Assessment summary - Ecosystem health	54
3.6.1	Physical processes	54
3.6.2	Chemical processes	54
3.6.3	Ecological processes	55
3.6.4	Outbreaks of disease, introduced species and pest species	56
3.6.5	Overall summary of ecosystem health	56
4.	Commercial and Non-Commercial Use	61
4.1	Background	62
4.2	Commercial marine tourism	63
4.2.1	Current state and trends of commercial marine tourism	63
4.2.2	Benefits of commercial marine tourism	65
4.2.3	Impacts of commercial marine tourism	66
4.3	Defence activities	67
4.3.1	Current state and trends of defence activities	67
4.3.2	Benefits of defence activities	68
4.3.3	Impacts of defence activities	68
4.4	Fishing	68
4.4.1	Current state and trends of fishing	68
4.4.2	Benefits of fishing	71
4.4.3	Impacts of fishing	72
4.5	Ports and shipping	75
4.5.1	Current state and trends of ports and shipping	75
4.5.2	Benefits of ports and shipping	76
4.5.3	Impacts of ports and shipping	76
4.6	Recreation (not including fishing)	77
4.6.1	Current state and trends of recreation	77
4.6.2	Benefits of recreation	78
4.6.3	Impacts of recreation	79
4.7	Scientific research	79
4.7.1	Current state and trends of scientific research	79
4.7.2	Benefits of scientific research	80
4.7.3	Impacts of scientific research	80
4.8	Traditional use of marine resources	80
4.8.1	Current state and trends of traditional use	80
4.8.2	Benefits of traditional use	82
4.8.3	Impacts of traditional use	83

4.9 Assessment summary - Commercial and non-commercial use	83
4.9.1 Benefits of use	84
4.9.2 Impacts of use	84
4.9.3 Overall summary of commercial and non-commercial use	85
5. Factors Influencing the Reef's Values	89
5.1 Background	90
5.2 Climate change	90
5.2.1 Current state and trends of climate change	91
5.2.2 Vulnerability of the ecosystem to climate change	95
5.2.3 Implications of climate change for regional communities	98
5.3 Coastal development	99
5.3.1 Current state and trends of coastal development	99
5.3.2 Vulnerability of the ecosystem to coastal development	103
5.3.3 Implications of coastal development for regional communities	105
5.4 Catchment runoff	105
5.4.1 Current state and trends of catchment runoff	105
5.4.2 Vulnerability of the ecosystem to catchment runoff	109
5.4.3 Implications of catchment runoff for regional communities	110
5.5 Direct use	110
5.5.1 Current state and trends of direct use	110
5.5.2 Vulnerability of the ecosystem to direct use	111
5.5.3 Implications of direct use for regional communities	112
5.6 Assessment summary - Factors influencing the Reef's values	113
5.6.1 Impacts on environmental values	113
5.6.2 Impacts on economic values	113
5.6.3 Impacts on social values	114
5.6.4 Overall summary of factors influencing the Reef's values	115
6. Existing Protection and Management	119
6.1 Background	120
6.1.1 Roles and responsibilities	120
6.1.2 Focus of management	124
6.1.3 Management tools	124
6.1.4 Assessing protection and management measures	128
6.2 Assessment of existing protection and management measures	129
6.2.1 Biodiversity protection	131
6.2.2 Climate change	132
6.2.3 Coastal development	133
6.2.4 Commercial marine tourism	133
6.2.5 Defence	134
6.2.6 Fishing (commercial and recreational)	134
6.2.7 Heritage	135
6.2.8 Ports and shipping	136
6.2.9 Recreation (not including fishing)	137
6.2.10 Scientific research	137
6.2.11 Traditional use of marine resources	138
6.2.12 Water quality	138
6.3 Assessment summary - Existing protection and management	140
6.3.1 Understanding of context	140
6.3.2 Planning	140
6.3.3 Financial, staffing and information inputs	141
6.3.4 Management systems and processes	141
6.3.5 Delivery of outputs	142
6.3.6 Achievement of outcomes	142
6.3.7 Overall summary of existing protection and management	142
7. Ecosystem Resilience	145
7.1 Background	146
7.1.1 Factors that affect resilience	146
7.1.2 Comparison with other coral reef ecosystems	147
7.2 Case studies of recovery after disturbance	148
7.2.1 Coral reef habitats	148
7.2.2 Lagoon floor habitats	151

7.2.3 Blackteatfish.....	153
7.2.4 Coral trout.....	153
7.2.5 Loggerhead turtles.....	154
7.2.6 Urban coast dugongs.....	156
7.2.7 Humpback whales.....	157
7.3 Assessment summary - Ecosystem resilience.....	158
7.3.1 Recovery after disturbance.....	158
7.3.2 Overall summary of ecosystem resilience.....	158
8. Risks to the Reef.....	163
8.1 Background.....	164
8.2 Scoping and assessing current threats.....	164
8.2.1 Scoping current threats.....	164
8.2.2 Assessing threats.....	164
8.3 Overall threat to the ecosystem.....	165
8.3.1 Most serious threats.....	165
8.3.2 Scale and timing of threats.....	169
8.3.3 Origin and existing management of threats.....	169
8.3.4 Interactions and compounding effects.....	171
8.4 Assessment summary - Risks to the Reef.....	171
8.4.1 Overall threat to the ecosystem.....	172
8.4.2 Overall summary of risks to the Reef.....	172
9. Long-Term Outlook.....	175
9.1 Background.....	176
9.2 Likely trends in key factors.....	176
9.2.1 Climate change.....	176
9.2.2 Catchment runoff.....	177
9.2.3 Coastal development.....	178
9.2.4 Direct use - extractive.....	178
9.2.5 Direct use - non-extractive.....	178
9.3 Current initiatives to improve resilience.....	178
9.4 Assessment summary - Long-term outlook.....	180
9.4.1 Outlook for the Great Barrier Reef ecosystem.....	180
9.4.2 Overall summary for long-term outlook.....	180
Appendices.....	183
Appendix 1 - Statutory requirements for the Outlook Report.....	183
Appendix 2 - Developing the Great Barrier Reef Outlook Report.....	184
Appendix 3 - Threats to the Great Barrier Reef ecosystem.....	185
Appendix 4 - Criteria for ranking likelihood and consequence to the Great Barrier Reef ecosystem.....	186
Index.....	187
Map 1 The Great Barrier Reef Region.....	xi
List of Figures	
Figure 1.1 Activities allowed under the Zoning Plan.....	3
Figure 2.1 Major habitats of the Great Barrier Reef.....	8
Figure 2.2 Reef bioregions of the Great Barrier Reef.....	9
Figure 2.3 Non-reef bioregions of the Great Barrier Reef.....	10
Figure 2.4 Changes in coastal intertidal seagrass habitats.....	13
Figure 2.5 Hard coral cover, Great Barrier Reef, 1993-2007 as measured during video transects.....	15
Figure 2.6 Hard coral cover, Great Barrier Reef, 1986-2008 as measured using manta tow surveys.....	16
Figure 2.7 Comparison of corals and algae in Princess Charlotte Bay and the Wet Tropics.....	17
Figure 2.8 The lagoon floor of the Great Barrier Reef.....	18
Figure 2.9 Example of a shoal in the Great Barrier Reef.....	18
Figure 2.10 Global distribution and diversity of mangrove species.....	19
Figure 2.11 Global distribution and diversity of seagrass species.....	20

Figure 2.12	Global distribution and diversity of hard coral species	21
Figure 2.13	Hard and soft coral species richness in the Great Barrier Reef	21
Figure 2.14	Estimated historic catch of sea cucumber in the Great Barrier Reef and adjacent areas	22
Figure 2.15	Species richness of some coral reef fish groups on the Great Barrier Reef, 1991-2007	24
Figure 2.16	Abundance of some coral reef fishes on the Great Barrier Reef, 1991-2007	25
Figure 2.17	Coral trout population densities across zones	26
Figure 2.18	Biomass of coral trout	26
Figure 2.19	Reef shark densities across zones	27
Figure 2.20	Reef shark population densities across zones	27
Figure 2.21	Loggerhead turtle nesting at Wreck Island, 1965-2005	28
Figure 2.22	Annual seabird breeding population at Raine Island, 1979-2003	29
Figure 2.23	Dugong populations in the Great Barrier Reef	30
Figure 3.1	Major physical, chemical and ecological processes in the Great Barrier Reef	39
Figure 3.2	Surface ocean currents in the south west Pacific Ocean	39
Figure 3.3	Number and severity of cyclones occurring within the boundaries of the Great Barrier Reef, 1970-2006	39
Figure 3.4	Freshwater inflow to the Great Barrier Reef from major catchments, 2004-2008	40
Figure 3.5	Freshwater inflow to the Great Barrier Reef by area for major catchments, 2004-2008	40
Figure 3.6	Places where freshwater seeps through the seafloor	41
Figure 3.7	Changes in exposure to sediments, Great Barrier Reef	41
Figure 3.8	Average sea level recorded for Townsville, Australia, 1959-2007	42
Figure 3.9	Sea surface temperature in the Great Barrier Reef, before 1930 and after 1990 ...	43
Figure 3.10	Reconstructed and observed changes in five-year average sea surface temperature in the Great Barrier Reef, 1741-2005	43
Figure 3.11	Changes in exposure to dissolved inorganic nitrogen, Great Barrier Reef	44
Figure 3.12	Exposure to herbicides, Great Barrier Reef	45
Figure 3.13	Pesticides in Great Barrier Reef waters, 2007/08	45
Figure 3.14	Changes in calcification in <i>Porites</i> spp., Great Barrier Reef, 1900-2005	45
Figure 3.15	A simple food web of the Great Barrier Reef	46
Figure 3.16	The importance of herbivorous fish	47
Figure 3.17	Effects of predation on prey species, Great Barrier Reef	48
Figure 3.18	Crown-of-thorns starfish (COTS) outbreaks across zones, Great Barrier Reef, 1994-2004	48
Figure 3.19	Changes in the ecological structure of coral reefs with increasing disturbance	49
Figure 3.20	The balance between coral and algae	50
Figure 3.21	White syndrome coral disease on the Great Barrier Reef, 1998-2004	51
Figure 3.22	The progression of a crown-of-thorns starfish outbreak along the Great Barrier Reef	52
