

ACKNOWLEDGMENTS

Principal funding for the Torres Strait Baseline Study was provided by the Australian Government through the Department of Environment, Sport and Territories.

Funding was also provided through the Strategic Initiatives Program of the Department of Prime Minister and Cabinet, on behalf of the Minister for Aboriginal and Torres Strait Islander Affairs. The Great Barrier Reef Marine Park Authority is pleased to acknowledge this significant contribution.

Additional funding was also provided by BHP Minerals and Porgera Joint Venture (comprising Placer (PNG) Pty Ltd, Highlands Gold Properties Pty Ltd, Renison Goldfields Consolidated Ltd and Mineral Resources Development Company Pty Ltd) and is gratefully acknowledged by the Great Barrier Reef Marine Park Authority.

The progress of the Study was guided by the Torres Strait Baseline Study Advisory Committee and the help and advice of all its members is gratefully acknowledged. Many thanks to D Lawrence who, as the Study's Coordinator, administered and supported all stages of the field program, liaised with the Torres Strait community, and managed the Advisory Committee. Thanks to V McGrath for his coordination of the Study on Thursday Island and his invaluable liaison with the Torres Strait community and to the Island Coordinating Council for provision of office accommodation and support for him. Thanks to I Dight for invaluable scientific input at the start of the Main Study.

Thanks to L Evans-Illidge, V McGrath, P Illidge, and D Lee Sye for their constant help and support on all field trips. Thanks also to J Brodie, A Keys, S Duquesne, B Lassig, D Lawrence, B Mapstone, C Schweizer, M Turner, C Vejle, and P Williams for help at different stages of both field trips in the Main Study. The collection of samples of traditional seafoods was undertaken by V McGrath with the assistance of many people from different island communities. Collection of community samples in Papua New Guinea was greatly assisted by Phillip Polon and his field staff from the PNG Fisheries Research Unit. Additional assistance with field trips was generously provided by R Coles and M Bishop (AFMA) and Jim Van der Kamp (Horn Island Research Station). The use of the research vessel 'Western Venturer' was generously provided by Ok Tedi Mining Ltd for the duration of both field trips in the Main Study; the crew were always helpful and friendly.

Thanks to the staff of the analytical laboratories for their advice and prompt service, in particular H Mawhinney, E McElroy, P Tomkins, P Williams (QDPI-ARI), G Barry and G Rayment (QDPI Ag Chem) and H Louie (AGAL, Sydney).

The preparation of the final report was greatly assisted by the statistical expertise of V Nelson, with thanks also to B Musso and R Ninio. A number of reviewers provided helpful comments for the preparation of the draft final report and the revision of the draft final report, particularly G Batley (CSIRO), P Imray (Queensland Health), G Rayment (QDPI), F Stenhouse (National Food Authority, Canberra), and T Ward (CSIRO).

The day-to-day running of the Study in Townsville was undertaken by D Lawrence, with additional help from S Woodley, J Brodie and V McGrath, and the support staff of the Research and Monitoring Section. Additional assistance and advice on numerous occasions was provided by S Spring, R Brown, S Davies, V Newell, R Pitcher, J Miller, and H Marsh.
