<i>* NB: While Manbarra are the Traditional Owners of Palm Island, 46 other tribes collectively known as 'Bwcolman' have used the marine resources of the area for nearly a century and this use is authorised by the Manbarra due to the unique situation of collocation created by past governemnet policies and actions. Any Traditional Use of Marine Resources calculations regarding the number of TO Groups accessing Tradtional Marine Resources should, arguably, include all 47 tribes living in the Palm Group.</i>
