

# Table of Contents

<b>EXECUTIVE SUMMARY .....</b>	<b>III</b>
<b>1. INTRODUCTION &amp; BACKGROUND.....</b>	<b>1</b>
1.1 Surveying techniques used in tropical seagrass habitats .....	1
1.2 Acoustic techniques .....	2
1.3 Objectives.....	2
<b>2. METHODS.....</b>	<b>2</b>
2.1 Site details.....	2
2.2 Experimental design.....	3
2.3 Acoustic surveying .....	3
2.3.1 Mapping seagrass habitat edges .....	4
2.3.2 Seagrass biomass .....	4
2.3.3 Sediment type.....	4
2.4 Dive-based Surveying .....	4
2.4.1 Mapping Seagrass Habitat Edges .....	4
2.4.2 Seagrass Biomass.....	5
2.4.3 Sediment Type.....	5
2.5 Comparison of methods.....	5
2.5.1 Mapping Seagrass Habitat Edges .....	5
2.5.2 Estimating Seagrass Biomass.....	5
2.5.3. Sediment type.....	5
<b>3. RESULTS.....</b>	<b>9</b>
3.1 Mapping seagrass habitat edges .....	9
3.1.1. Fan beam mapping using a transducer on a "towfish" .....	9
3.1.2. Fan beam mapping using a fixed transducer .....	9
3.2 Estimating seagrass biomass .....	9
3.2.1. Finescale (sites with 10 m radius).....	10
3.2.2. Broadscale (regions >1 hectare).....	10
3.3 Describing sediment type .....	16
<b>4. DISCUSSION.....</b>	<b>19</b>
4.1 Mapping seagrass meadow edges .....	19
4.2 Seagrass biomass.....	20
4.3 Other seagrass mapping information.....	21
4.4 Sediment mapping .....	21
4.5 Efficiencies of survey methods .....	22
<b>5. CONCLUSIONS AND RECOMMENDATIONS.....</b>	<b>23</b>
<b>6. REFERENCES.....</b>	<b>25</b>
<b>APPENDIX 1. DETAILS OF THE ACOUSTIC TECHNIQUE.....</b>	<b>27</b>

## List of Figures and Tables

<b>Figure 1.</b>	Survey areas in Cairns Harbour used to evaluate acoustic techniques for surveying seagrasses and sediments.....	7
<b>Figure 2.</b>	Equipment used in acoustic survey of benthic environments: a) configuration of fan beam transducer when deployed from survey vessel and b) hardware of acoustic systems. ....	8
<b>Figure 3.</b>	Acoustic map of Esplanade seagrass habitat, May 1996. Overlay with ground-truthed (diver) sites with seagrass above-ground seagrass biomass (May 1996) and meadow boundaries (December 1993). ....	11
<b>Figure 4.</b>	Acoustic map of Ellie Point seagrass habitat, May 1996. Overlay with ground-truthed (diver) sites with seagrass above-ground seagrass biomass.....	12
<b>Figure 5.</b>	Acoustic map of Bessie Point seagrass habitat, May 1996. Overlay with ground-truthed (diver) sites with seagrass above-ground seagrass biomass (May 1996) and meadow boundaries (December 1993). ....	13
<b>Figure 6.</b>	Sites in each survey area at which above-ground seagrass biomass was ground-truthed by divers and examined using acoustic conical beam.....	14
<b>Figure 7.</b>	Mean acoustic intensity (decibels) and ground-truthed biomass ( $\text{g DW m}^{-2}$ ) at each site examined at each survey area in Cairns Harbour. ....	15
<b>Figure 8.</b>	Acoustic response measured in decibels and mean sediment grain-size along survey transect at Bessie Point. ....	17
<b>Figure 9.</b>	Acoustic response measured in decibels and mean sediment grain-size along survey transect at Ellie Point. ....	17
<b>Figure 10.</b>	Comparison of acoustic intensity and ground-truthed sediment composition for each sediment sampling site at Bessie Point. ....	18
<b>Table 1.</b>	Seagrass species, ground-truthed mean above ground biomass and the number of sites examined by both acoustic technique and divers at each survey area in Cairns Harbour. ....	9
<b>Table 2.</b>	Results of correlation and regression analysis between acoustic data (decibels) and above-ground seagrass biomass ( $\text{g DW m}^{-2}$ ) at each survey area using conical beam (grazing angle $10^\circ$ ). ....	10
<b>Table 3.</b>	Results of two-sample T-tests analysis between regions within each survey area for acoustic (decibels) and diver ( $\text{g DW m}^{-2}$ ) methods. ....	10
<b>Table 4.</b>	Results of correlation and regression analysis between acoustic data (decibels) and sediment grain size at Bessie Point using multiple reflection technique (conical beam grazing angle $90^\circ$ ). ....	16
<b>Table 5.</b>	Results of correlation and regression analysis between acoustic data (decibels) and sediment grain size at Ellie Point using backscatter technique (conical beam grazing angle $45^\circ$ ). ....	16
