Preface .....	i
---------------	---

## SECTION 1. Contributed papers

### SESSION 1 .....

#### Land use influence and nearshore processes and pressures

The distribution of sediments and nutrients throughout the Whitsunday Islands inner shelf region, Great Barrier Reef <i>Steve G Blake</i> .....	5
Spatial variation in stream water quality in a humid tropical catchment: long profile and tributary stream patterns <i>DT Neil</i> .....	12
Water quality monitoring in Australia <i>David Tait and Charles Lewis*</i> .....	18
The protean nature of 'wet tropical coast' flood plumes in the Great Barrier Reef lagoon - distribution and composition <i>Jeremy Taylor* and Michelle Devlin</i> .....	25
Detection of anthropogenic and natural mercury in sediments from the Great Barrier Reef lagoon <i>G Stewart Walker* and Gregg J Brunskill*</i> .....	30

### SESSION 2 .....

#### Pressures and effects on the Great Barrier Reef lagoon

Macroalgal distributions on the Great Barrier Reef: a review of patterns and causes <i>Laurence McCook* and Ian R Price</i> .....	37
--	----

### SESSION 3 .....

#### Pressures on reefs, islands and cays

Reef top hydrodynamics at Heron Island <i>MR Gourlay* and Jennifer LF Hacker*</i> .....	49
Harbour bund wall construction at Heron Island: coral response <i>Jennifer LF Hacker* and MR Gourlay*</i> .....	55
Quantifying organic content of material from coral reefs <i>SW Purcell</i> .....	61
Coral skeletal destruction - boring sponges on the Great Barrier Reef <i>CHL Schönberg*, CR Wilkinson* and KN Hoppe</i> .....	67
The effect of depth and wave exposure on the density and porosity of <i>Pocillopora damicornis</i> in the Solitary Islands Marine Reserve, New South Wales <i>KA Spinaze*, SDA Smith and RD Simpson</i> .....	72

## SESSION 4 ·····

### Large-scale phenomena and organism response

- Cost-effective small-scale crown-of-thorns starfish eradication procedures using acid injections *David Fisk\*, Lyle Vail\* and Anne Hoggett* ..... 79
- An alternative approach to the hydrodynamic design of infrastructure on the Great Barrier Reef: Norman Reef pontoon case study *SR Massel\*, IR Kapitzke\* and PR Gleeson* ..... 86
- Investigating future threats from tropical cyclones, storm surges and sea level rise  
*A Barrie Pittock\*, Kathy McInnes and Kevin Walsh* ..... 92
- Tropical cyclone impacts on the coral reefs of the Great Barrier Reef region  
*Marjetta L Puotinen* ..... 99

## ADDITIONAL SESSION ·····

### Management-science links

- Pontoon dynamics in a coral reef lagoon: numerical modelling and field studies  
*MF Britton\* and AJ Johnston\** ..... 105
- Philosophy of marine park management *Denise Russell* ..... 111
- Investigation of load capacities of mooring anchor systems  
*K van Donderen, B Greensill, B Way and A J Johnston\** ..... 117
- Integrating R&D into decision-making for natural resource management in coastal northern Australia  
*Daniel H Walker\*, Andrew KL Johnson\* and Jennifer A Bellamy* ..... 122
- Towards a scientifically-based implementation plan for ecologically sustainable use and biodiversity conservation in the Great Barrier Reef World Heritage Area  
*Leon Zann and Jon Brodie\** ..... 128

## SESSION 5 ·····

### People and the Reef

- Using geographic information systems for integrating socio-economic and cultural information into reef planning and management *D Benzaken\* and M Gilbert\** ..... 139
- Heron Island reef flat: 15 years of change *Vicki J Harriott* ..... 145
- Recreational fishers in Shoalwater Bay and adjacent waters: motivations and attitudes *GR Jennings* ..... 150
- Heron Island, Great Barrier Reef: an environmental history in outline *DT Neil* ..... 156

## SESSION 6 ·····

### Reef connectedness

- Habitat optima of soft corals on the central Great Barrier Reef: niche characterisation using regression tree analysis *Katharina E Fabricius\* and Glenn De'ath* ..... 167

SESSION 7 ·····

**Managing the Great Barrier Reef World Heritage Area**

The Global Coral Reef Monitoring Network: building on Australian research and development <i>CR Wilkinson</i> .....	177
---	-----

**SECTION 2. Abstracts of Poster Presentations not produced as a paper**

Effects of anthropogenic eutrophication on micro-organisms and nutrients in coral reef waters <i>GJ Gast, WJ Steinhoff and RPM Bak</i> .....	185
Suspended particulate matter: an important energy source for corals on nearshore reefs? <i>KRN Anthony and BL Willis</i> .....	186
Growth of <i>Sargassum baccularia</i> , a macroalga dominant on Great Barrier Reef nearshore reefs, is promoted by short-term nutrient pulses <i>B Schaffelke and DW Klumpp</i> .....	187
Diver-minke whale interactions on the northern Great Barrier Reef <i>PW Arnold and RA Birtles</i> .....	188
Environmental and ecological controls on the in situ population growth rates and distribution of small phytoplankton inhabiting shelf waters of the Great Barrier Reef <i>N Crosbie</i> .....	189
Detritus and the Great Barrier Reef: quality and quantity over time and space <i>M Dommissie and M Furnas</i> .....	190
Relationships between the distribution and abundance of sessile epibenthos in inter-reefal areas of Torres Strait and seabed current stress and bedload partings <i>BG Long, CR Pitcher, L Bode and LB Mason</i> .....	191
Terrigenous and suspended sediments influences the distribution and abundance of seagrass and corals on coral reefs in Torres Strait <i>BG Long, TD Skewes and DM Dennis</i> .....	192
Interactions between dugongs and gill-netting in Shoalwater Bay <i>T Preen</i> .....	193
Appropriate spatial scales for marine fishery reserves for management of coral trout, <i>Plectropomus leopardus</i> , on the Great Barrier Reef <i>CR Davies</i> .....	194
Design of experimental manipulations of line fishing and area closures on the Great Barrier Reef <i>BD Mapstone, RA Campbell, ADM Smith and CR Davies</i> .....	195
The effect of re-opening Bramble Reef to bottom fishing on fishing behaviour and catch rates of commercial and recreational line fishers <i>BD Mapstone, CR Davies, JB Higgs and DJ Welch</i> .....	196
<i>Pulvinaria urbicola</i> Cockerell on <i>Pisonia grandis</i> at Tryon Island <i>JA Olds, RJ Elder, RM Charles, JR Platten and KL Bell</i> .....	197
A strategic approach to ensuring that fishing in the Great Barrier Reef Marine Park is ecologically sustainable <i>J Robertson and M Russell</i> .....	198

Spawning periodicity of coral trout, <i>Plectropomus leopardus</i> (Pisces: Serranidae), on the northern Great Barrier Reef <i>MA Samoilys</i> .....	199
Response of the coral-associated crustacean fauna of scleractinian corals to increased sedimentation: a prospective study <i>TM Sin</i> .....	200
The role of benthic mega-invertebrates in nutrient cycles on coral reefs: echinoderm density, population size and estimated population excretion rates on Rib Reef <i>S Uthicke and DW Klumpp</i> .....	201
Oceanic forcing of currents in the Great Barrier Reef: initial model studies <i>L Bode, LB Mason, and DM Burrage</i> .....	202
Managing recreation and tourism in the Whitsundays <i>BM Barnett1 and CC Thomas2</i> .....	203
Managing the effects of tourism use in the Great Barrier Reef World Heritage Area <i>Z Dinesen</i> .....	204
A coastal resource atlas for the Great Barrier Reef: report on a pilot study <i>SJ Gardiner, JG Blackma1 and J Day</i> .....	205
'No anchoring areas' – a management strategy being applied in the Whitsundays <i>A joint poster by the Queensland Department of Environment, the Great Barrier Reef Marine Park Authority and the Order of Underwater Coral Heroes (OUCH)</i> .....	206
The primary goal of the Great Barrier Reef Marine Park Authority is to protect the natural values of the Marine Park <i>J Phillips</i> .....	207
Marine harvest refugia as a tool for inshore fish population enhancement – some examples from Australia and elsewhere <i>DA Pollard</i> .....	208
Recognising Indigenous interests in the Great Barrier Reef World Heritage Area <i>D Saylor, L Sommer and G Smith</i> .....	209
Do scraping, tissue and breakage injuries have the same impact? A case study for two scleractinian corals, <i>Acropora hyacinthus</i> and <i>Montipora tuberculosa</i> <i>V Hall</i> .....	210
Developing a reliable coral reef monitoring program for use by community groups, tourist operators and visitors on the Great Barrier Reef <i>BM Musso and G Inglis</i> .....	211
Impacts of tourist pontoons on the Great Barrier Reef <i>V Nelson and B Mapstone</i> .....	212
The Cod Hole: potato cod numbers decreasing <i>LL Vail and AK Hoggett</i> .....	213
Patterns of skeleton formation in coral recruits: can species be identified? <i>AH Baird</i> .....	214
Ecology of <i>Drupella</i> at Heron and Wistari reefs <i>I Fellegara</i> .....	215
Chronic damage to corals from fish: corallivory by chaetodontids <i>MS Pratchett</i> .....	216
Interspecific variation in dispersal of the pelagic stages of reef fishes: will general models of reef connectivity be unrealistic? <i>IC Stobutzki</i> .....	217

Annual changes in coral cover over a broad geographic scale on the Great Barrier Reef <i>HPA Sweatman and R Ninio</i> .....	218
Recruitment in reef fishes of commercial significance: implications for reef connectivity and population management on the Great Barrier Reef <i>GG Wilson</i> .....	219
Movements of the common coral trout, <i>Plectropomus leopardus</i> (Serranidae), in relation to spawning aggregations <i>DC Zeller</i> .....	220
Education or enforcement – the better deal? <i>J Alder</i> .....	221
Aboriginal marine ranger training program <i>I Kerr</i> .....	222
Too much planning and research: not enough action? The role of community groups in coastal conservation in north Queensland <i>A Reynolds</i> .....	223

APPENDIX . . . . .

List of Delegates .....	225
-------------------------	-----

Throughout this table of contents\* indicates, in the case of a multi authored paper, the person who presented the paper at the conference.
