SUMMARY	1
INTRODUCTION	4
Background	4
Aircraft Noise Pollution	4
The Great Barrier Reef Marine Park	4
Purpose	6
Aims and Objectives	6
Aim	6
Objectives	6
A REVIEW OF RELATED STUDIES	7
Studies Undertaken in Australia	7
Studies Undertaken Overseas	8
Methods Used to Assess and Monitor Overflights	8
Indigenous and Self Noise Sound Studies	9
Aircraft Sound Studies	9
The Use of Secondary Data Sources	10
Dose-Response Relationships	11
Constraints of Overseas Studies	11
Findings of Overseas Studies	12
RESEARCH METHODS	13
Study Site	13
Survey Design	16
Sites of Data Collection	16
Data Collection Periods	19
Survey Methods	19
Variables Measured	19
Data Collection	23
Methods of Analysis	24
Background Sound Data	24
Aircraft Data	25
Aircraft Activity	25
Aircraft Sound	25
Watercraft Data	26
Human Use Data	26
RESULTS	27
Aircraft Activity	27
Number and Types of Aircraft Events Relative to Sites	27
Number and Types of Aircraft Events Relative to Times of Day	30
Proportion of Sites Affected by the Same Aircraft Visits	31
Aircraft Sound	32
Natural Sound Levels	32
Aircraft Sound Levels	33
Proportion of Aircraft Events Registering Above Background Sounds	33
Maximum Aircraft Sound Levels	34
Duration of Aircraft Sound	38

Appendix 5.2.	Event 74 - Helicopter Flyover at the Northern End of Whitehaven Beach.	70
Appendix 5.3.	Event 143 - Seaplane Flyover from the North, Landing Close to Site 4.....	71
Appendix 5.4.	Event 91 - Light Aircraft (other than a seaplane) Flyover from North to South.	71
Appendix 5.5.	Concurrent Events 169, 170 (seaplane takeoffs) & 171 (seaplane landing).....	72
Appendix 5.6.	Event 139 - Helicopter Flyover in the Vicinity of Hill Inlet.....	72
Appendix 5.7.	Event 146 - Seaplane Takeoff from Between Sites 3 and 4 and Flyover Toward the South.	73
Appendix 5.8.	Event 164 - Seaplane Flyover and Landing Close to Site 2.....	73
Appendix 5.9.	Event 123 - Helicopter Flyover from South to North.	74
Appendix 5.10.	Event 181 - Helicopter Flyover / Landing in the Seasonal Landing Zone Between Sites 4 & 5.	74
Appendix 6.0.	Further Results – Aircraft Sound.	75
Appendix 6.1.	Frequency of Occurrence of Lmax Aircraft Induced Sound Levels Site 2.	75
Appendix 6.2.	Frequency of Occurrence of Aircraft Induced Lmax Sound Levels at Site 3.	75
Appendix 6.3.	Frequency of Occurrence of Lmax Aircraft Induced Sound Levels at Site 4.	76
Appendix 6.4.	Frequency of Occurrence of Maximum Aircraft Induced Sound Levels at Site 5.	76
Appendix 6.5.	Average Aircraft Maximum Decibel Levels Relative to Site and Time of Day.....	77
Appendix 6.6.	Average Hourly Duration of Aircraft Sound Relative to Site and Time of Day.....	77
Appendix 6.7.	Average and Absolute Lmax Relative to Aircraft Event Type	78
Appendix 7.0.	Factors of Sound Measurement.....	79
Appendix 7.1.	Measurement Standards.....	79
Appendix 7.2.	Weighting Networks.....	79
Appendix 7.3.	Metrics Used	80
Appendix 7.4.	Sampling Period	80
Appendix 7.5.	The Effect of Altitude.....	80
Appendix 8.0.	Glossary	82

FIGURES

Figure 1.0.	Detail of Study Site.....	1
Figure 3.1.	Whitsunday Islands and Adjoining Mainland, North Queensland, Australia.	13
Figure 3.2.	Photograph of Whitehaven Beach Looking NNW Toward Hill Inlet.....	14
Figure 3.3.	The Recreation Opportunity Spectrum (ROS) Settings Along Whitehaven Beach.	15
Figure 3.4.	Aircraft Landing Zones Along Whitehaven Beach.....	16
Figure 3.5.	Data Collection Sites Relative to ROS Settings, Whitehaven Beach.....	17
Figure 3.6.	Study Site 2, Setting 2.....	17
Figure 3.7.	Study Site 3, Setting 3.....	18
Figure 3.8.	Study Site 4, Setting 4.....	18
Figure 3.9.	Study Site 5, Setting 5.....	19
Figure 3.10.	Sound Level Data Collection with the Analogue Sound Level Meters.	23
Figure 4.1.	Total Number of Aircraft Events Relative to Data Collection Site.	28

Figure 4.2.	Hourly Rate of Aircraft Events at Each Site on Each Trip.	28
Figure 4.3.	Proportion of Event Types Experienced at Each Site.	29
Figure 4.4.	Average Hourly Number of Aircraft Events at Each Site.	30
Figure 4.5.	Average Hourly Number of Different Types of Aircraft Events.	31
Figure 4.6.	Proportion of Aircraft Events Affecting 1, 2, 3 or 4 Sites.	31
Figure 4.7.	Distribution of Maximum Sound Pressure Levels Over All Sites.	35
Figure 4.8.	Mean Aircraft Lmax Recorded at Each Site on Each Trip.	36
Figure 4.9.	Average Maximum Sound Pressure Levels Relative to Event Type.	37
Figure 4.10.	Relationship Between Distance and Lmax Levels Recorded During Seaplane Takeoffs.	38
Figure 4.11.	Durations of Aircraft Events in Seconds.	39
Figure 4.12.	Average Number of People Within Each Setting at Three Set Times of Day.	40
Figure 4.13.	Variables Indicating the Activity and Sound Levels of Watercraft at Each Site.	40
Figure 4.14.	Normal Q-Q Plot of Standardised Residual for Lmax.	43
Figure 5.1.	Trends in Use of Whitehaven Beach by Several Air Tour Operators	45

TABLES

Table 3.1.	Background Sound Level Data Collection.	21
Table 3.2.	Aircraft Activity and Sound Level Data Collection.	21
Table 3.3.	Watercraft Activity and Sound Level Data Collection.	22
Table 3.4.	Levels of Human Use Data Collection.	22
Table 3.5.	Wind Speed and Direction Data Collection	22
Table 3.6.	Temperature Data Collection	22
Table 3.7.	Humidity Data Collection	23
Table 4.1.	Average Background Sound Levels.	32
Table 4.2.	Comparative Background Sound Level Data.	33
Table 4.3.	Proportions of Aircraft Events Registering Above the Average Background Sound Level Recorded at Each Site on Each Day.	34
Table 4.4.	Descriptive Statistics of Maximum Sound Levels at Each Site.	35
Table 4.5.	Durations of Aircraft Sound Levels Above Background Sound Levels.	38
Table 4.6.	Summary Anova Table for the Variable 'Hourly Visitation Rates'.	41
Table 4.7.	Summary Anova Table for Natural Sound Levels Between Sites.	42
Table 4.8.	Summary Anova Table for Lmax Between Sites and Trips.	42
Table 4.9.	Summary Table of C2 Analysis, Number of People Between Sites and Times.	44
