

CONTENTS

1. INTRODUCTION	1
2. THE EFFECT OF SEDIMENT AND RUNOFF ON CORALS AND CORAL REEFS	2
Siltation Effects at the Colony Level	3
Coral Reefs Affected by Sediment Stress	5
3. SEDIMENT YIELD FROM NATURAL AND DISTURBED RAINFOREST CATCHMENTS	6
4. THE CAPE TRIBULATION AREA	9
Location	9
Climate and Hydrology	9
Rainforest	11
Geology and Geomorphology of the Terrestrial Environment	11
Fringing Reefs: Surface Morphology	12
Fringing Reefs: Evolution	14
Fringing Reef Communities	14
Nearshore Environment	15
Settlement and Land Use	15
5. THE MEASUREMENT OF TURBIDITY AND SILTATION RATES IN THE NEARSHORE ENVIRONMENT	16
Measurement of Turbidity	16
Use of Optical Instrumentation	16
Secchi disc measurements	16
Suspended sediment concentrations	17
Measurement of Sediment Settlement	17
6. METHODOLOGY	18
Selection of Sampling Sites	18
Field Methods	18
Water sampling	21
Sediment traps	21
Laboratory Analysis	28
Marine derived samples from sediment traps	28
Suspended sediment samples	28
Statistical Analysis	28
7. RESULTS FROM SUSPENDED SEDIMENT SAMPLING	28
Problems and Limitations	32
Results from Cape Tribulation Streams	32
Natural and Enhanced Suspended Sediment Concentrations	34
Regional Variability and Influence of Road Characteristics	34

8. SEDIMENTATION ON THE FRINGING REEFS OF THE CAPE TRIBULATION AREA	35
The Sediment Trap Programme	35
Sediment Deposition by Area	37
Sedimentation Rates by Zone and Area	41
Significance of Differences	47
Variation in Sedimentation Rates Over Collecting Periods	48
Sediment Rates and Environmental Variables	51
 9. CHARACTERISTICS OF SEDIMENTS FROM SEDIMENT TRAPS	54
The Sand Fraction	55
The Silt and Mud Fraction	55
 10. DISCUSSION	58
Enhanced Sedimentation Rates in the Cape Tribulation Area	58
Comparison with Sedimentation Rates from Other Areas of the Great Barrier Reef .	59
Sedimentation Rates from Sites Other than the Great Barrier Reef and Tolerance Limits of Coral Reefs	60
 11. CONCLUSIONS AND MANAGEMENT IMPLICATIONS	62
 12. ACKNOWLEDGEMENTS	65
 13. REFERENCES	65
 APPENDIX NEARSHORE HYDRODYNAMICS AND SEDIMENT DYNAMICS OF THE FRINGING REEF COAST IN THE CAPE TRIBULATION AREA	

LIST OF TABLES

TABLE 1.	Stream samples taken between March 1985 and May 1989	29
TABLE 2.	Catchment areas and annual runoff volumes based on 2000 mm annual runoff ..	36
TABLE 3.	Replicate averages of suspended sediment measured offshore in January and July, 1988	36
TABLE 4.	Mean and standard deviation of total sand and mud sedimentation rates (mg cm ⁻² dy ⁻¹) each transect	40
TABLE 5.	Mean and standard deviation of total sand and mud sedimentation rates (mg cm ⁻² dy ⁻¹) for each area	41
TABLE 6.	Mean and standard deviation of total sand and mud sedimentation rates (mg cm ⁻² dy ⁻¹) for each zone	42
TABLE 7.	Mean rates of sedimentation by zone and sediment type for the three areas (mg cm ⁻² dy ⁻¹)	45
TABLE 8.	Mean and standard deviation of total sedimentation rates (mg cm ⁻² dy ⁻¹) for traps heights above the substrate, where 1-60 cm, 2-40 cm and 3-20 cm	45
TABLE 9.	A three-factor Analysis of Variance (ANOVA) of total sand and mud rates with sites as a random factor and other factors fixed	47
TABLE 10.	Mean and standard deviation for total, sand and mud sedimentation rates (mg cm ⁻² dy ⁻¹) over time	48
TABLE 11.	Mean and standard deviation of total, sand and mud sedimentation rates for each area at each time	49
TABLE 12.	A three-factor Analysis of Variance (ANOVA) of total, sand and mud sedimentation rates with time specified as a random factor	50
TABLE 13.	Environmental variables	52
TABLE 14.	Cape Tribulation correlation matrix	53
TABLE 15.	Detailed microscopy assesment of sand fraction >63 µm samples from the Myall Creek area	55
TABLE 16.	Results of mud and silt samples >63 µm that were dissolved in 10% HCL to determine carbonate content. Where sampling period: 3 - 27/2/86 to 3/4/86, 4 - 4/4/86 to 24/4/86, 5 - 25/4/86 to 21/5/86; habitat: 1 - inner reef flat, 2 - reef flat, 3 - outer reef flat, 4 - shallow living reef, 5 - deep living reef.	56
TABLE 17.	Results of three X-ray Diffraction Analyses (XRD) to determine the mineralogy of the sediment. One sample was collected in upper second creek (Transect 5), the other two were collected in the living reef zone of South Donovan (Transect 11) and of South Myall (Transect 1)	57

LIST OF FIGURES

FIGURE 1. Response of rainforest catchments to road construction after O'Loughlin (1985) .	8
FIGURE 2. Location of the study area	10
FIGURE 3. Cape Tribulation reefs and location of transects	13
FIGURE 4. The southern old road section showing Tribulation, South Tribulation and Myall Reefs	19
FIGURE 5. The central new road section, Emmagen Reef to Cape Tribulation	19
FIGURE 6. The central new road section in February 1985 shortly after heavy rain	20
FIGURE 7. The northern control area, Corner Creek transect	20
FIGURE 8. Sediment dominated back reef zone, Myall Reef	22
FIGURE 9. Algal dominated reef crest and narrow inner reef zone, south of Emmagen Creek	22
FIGURE 10. Sediment traps located on the reef front, Rykers Reef	23
FIGURE 11. Typical foliose <i>Montipora</i> sp, potentially sediment collectors, but adapted to low light intensities	23
FIGURE 12. Reef transects, trap sites and morphological zones	24
FIGURE 13. A schematic comparison of total sediment accumulated within traps at each area in 1986 at Cape Tribulation and the relative rates ($\text{mg cm}^{-2} \text{ dy}^{-1}$) at each transect	38
FIGURE 14. Histograms displaying mean (+ 1 SD) total, sand and mud rates ($\text{mg cm}^{-2} \text{ dy}^{-1}$) at each transect.	39
FIGURE 15. Mean (+ 1 SD) sedimentation rates ($\text{mg cm}^{-2} \text{ dy}^{-1}$) for trap heights above substrate for the three habitat zones	46
FIGURE 16. Histograms displaying mean sedimentation rates ($\text{mg cm}^{-2} \text{ dy}^{-1}$) for each collection period showing proportion of sand and mud	51
FIGURE 17. Typical road section with steep grades, unstabilised cut and fill sections	63
FIGURE 18. Gullyng and landslips are frequent after heavy rain especially on steeper road sections. Potential remains for complete slope failure and massive sediment yield.	64
