

ORGANIZATION INDEX

Great Barrier Reef Marine Park Authority

The suitability of using strontium levels, as recorded in corals at precipitation, for sea-water temperatures interpretation.	57
The productivity and bioaccumulation of trace elements by blue-green algae of the Great Barrier Reef.	64
Systematics and Ecology of Phytobenthos of Swain Reefs.	72
Biological basis for managing population of dugongs and other marine mammals in Northern Australia (pilot study).	78
Functional Morphology and Nutrition of the Dugong in relation to its seagrass diet.	79
Genetic variability among geographically isolated nesting populations of <i>Caretta caretta</i>	106
The effects of fuel oil, oil emulsifier and lower salinity upon the common Indo-Pacific reef coral <i>Acropora formosa</i>	112
Analysis of visually dominant organisms data from manta tow coral surveys.	151
Annual survey of recruitment of selected reef species in selected habitats on Capricornia Reefs.	152
Aspects of community dynamics and biology of Scleractinian corals on the Heron Reef crest.	153
Coral and Coral Trout Survey of the Far Northern Section of the Great Barrier Reef Marine Park.	154
Coral Reef Metabolism and Calcification.	155
Hereditary Structure and Genetic Exchange in Coral Populations.	156
Investigation into the relationship between breeding and feeding of seabirds around reef environments.	157
Investigation of environmental and biological factors causing morphological variation in reef corals, <i>Pavona cactus</i> and <i>Turbinaria mesenterina</i>	158
Metabolic Studies of the Crown of Thorns Starfish.	159
Planktonic Dispersal of Larval Coral.	160
Review of Beche-de-Mer (Holothurian) surveys.	161
Sudbury reef assessment.	162
Year to year variation of recruitment of juvenile hard corals on a reef front.	163
Study of the Decision-Making Behaviour of Day Visitors to the Great Barrier Reef Marine Park.	195
Compilation of Fisheries Economics of the Great Barrier Reef.	197
An evaluation of economic and biological aspects of coral collecting in the Great Barrier Reef Marine Park.	200
Central Section Survey - Great Barrier Reef.	201
Coral trout monitoring at Heron Island Reef.	202
Monitoring replenishment areas: coral trout survey techniques.	203
Reef fish tagging in the Capricornia Section of the Great Barrier Reef Marine Park.	204
Biology and management of <i>Trochus niloticus</i>	211*
Survey of Charter Boats, Great Barrier Reef Region: Stage 1.	219
Traditional uses of Marine Resources by Aboriginal Communities on the East Coast of Cape York Peninsula: Stage 1.	220
Resource Inventory, Far Southern Area, Great Barrier Reef.	224
Assessment of Impacts Associated with the Construction of Navigation Aids.	225
History of Crown of Thorns Incidence on the Great Barrier Reef.	226
The Impact of Reef walking at Hardy Reef.	227
Tourist impact on reef corals.	228
Workshop on contaminants in waters of the Great Barrier Reef.	229
Workshop: Response to Hazardous Chemical Spills in the Great Barrier Reef Region.	230
Application of recreational opportunity spectrum concepts to Marine Park Planning.	235

ORGANIZATION INDEX

Great Barrier Reef Marine Park Authority	
Application of Recreational Opportunity Spectrum to a Marine Park.	236
Methods for the Re-establishment of Hard Corals in Denuded Reef Systems.	237
User Survey, Capricornia Section: Stage 1.	238
Aquatic Science Research Electronic Bulletin.	240
Griffith University	
Novel Compounds from Marine Organisms.	27
Feeding and breeding ecology of seabirds.	80
Chemical Regulation of Biological Processes. Host Release Factors in Marine Symbioses.	113
Analysis of variation between and within plant populations of introduced and naturally occurring plant populations on coral atolls.	164*
Population biology of the tropical gastropod <i>Strombus luhuanus</i> , and its resilience to human exploitation.	165
Survey of Charter Boats, Great Barrier Reef Region: Stage 1.	219
The Impact of Reef walking at Hardy Reef.	227
Griffith University (Subcontract)	
Annual survey of recruitment of selected reef species in selected habitats on Capricornia Reefs.	152
Investigation into the relationship between breeding and feeding of seabirds around reef environments.	157
Compilation of Fisheries Economics of the Great Barrier Reef.	197
Tourist impact on reef corals.	228
Application of Recreational Opportunity Spectrum to a Marine Park.	236
Heron Island Research Station	
Coral trout monitoring at Heron Island Reef.	202
Hunter District Water Board	
Techniques for underwater photogrammetry using simple cameras.	9
James Cook University of North Queensland	
Separability of color aerial photographs and Landsat MSS data for Heron island reef and spectral signatures of coral reef feature, GBR.	3
Collaborative flow modelling study of the Great Barrier Reef.	10
Evaluation of river mixing processes.	16
Hydrodynamic studies of water movements within the Great Barrier Reef region.	17
Tidal flow across Reefs.	22
The isolation of novel compounds from marine invertebrates.	28
Modern Sediment Disposal at the Burdekin River Mouth.	50
Role of <i>Acanthaster</i> in Reef Degradational Processes.	51
Sedimentation between the Herbert Delta and Orpheus Island.	52
Circulation and sediment movement on and around north Queensland bayhead fringing reefs, with special reference to the effect of resort development.	55
Sr/Ca ratios in corals as an indicator of palaeotemperature.	56*
The suitability of using strontium levels, as recorded in corals at precipitation, for sea-water temperatures interpretation.	57
Biology and ecology of boring organisms in coral reefs.	65*
Photoadaptation in marine algae.	66*
The genus <i>Sonneratia</i> (Sonneratiaceae) in Australia.	67
The role of crustose coralline algae in coral reef ecosystems with special reference to their contribution to primary production and calcification.	68
Systematic survey of the turf algal flora of coral reefs in NE Queensland.	73
Systematics and ecology of tropical Australian marine macroalgae.	74

ORGANIZATION INDEX

James Cook University of North Queensland

A study of the macroparasites of the Cooktown Salmon, <i>Eleutheronema tetradactylum</i>	81
Aspects of the biology of anchovies (Teleostei : Engraulidae) in waters off Townsville.	82
Feeding structures, growth, and spat fall of scallops of the genus <i>Amusium</i> (Bivalvia: Pectinidae) in waters off Townsville.	83
Investigation of the life cycle behaviour and temporal and spatial distribution of the box-jellyfish, <i>Chironex fleckeri</i>	84*
Larval growth, ecology and behaviour of commercially significant fish and crustacean species in the continental shelf zone of the Great Barrier Reef.	85
Production of planulae in <i>Pocillopora damicornis</i>	86
Reproductive biology of Caprellid-Amphipods.	87
Reproductive strategies and resource partitioning in comatulid crinoids at Lizard Island.	88
Studies on the biology of Grunters (Teleostei: Pomadasysidae) from north Queensland waters.	89
Studies on the reproduction and growth of flatfish species (Teleostei : Pleuronectiformes) from waters off Townsville.	90
The culture of the giant clam (Tridacnidae) for food and restocking of tropical reefs.	91
Population genetics of the Crown-of-Thorns starfish.	100*
The effects of fuel oil, oil emulsifier and lower salinity upon the common Indo-Pacific reef coral <i>Acropora formosa</i>	112
Eye structure in polychaetes.	114
Monitoring heavy metal pollution in tropical marine waters.	115
Physiology and ultrastructure of prokaryotic green algal symbionts from certain tropical ascidians.	116
Structure and function of sense organs in the banana prawn <i>Penaeus merguensis</i> in relation to the animals behaviour.	117
The importance of soft corals in reef ecology: a chemical and biological study.	118
The ultrastructure of scleractinian corals under normal and stress conditions.	119
Coral Reef Metabolism and Calcification.	155
Planktonic Dispersal of Larval Coral.	160
Review of Beche-de-Mer (Holothurian) surveys.	161
Aspects of the biology of herbivorous reef fishes, with particular reference to parrotfish (family Scaridae)	166
Depth distribution of Hermatypic scleractinian corals.	167
Distribution and abundance of epibenthic/hypoplanktonic communities in the Davies Reef Lagoon.	168*
Dynamics of a shallow water marine community.	169
Ecology and physiology of the molluscan (Gastropoda) genera <i>Cellana</i> and <i>Siphonaria</i>	170
Marine insects of Barrier Reef coastal waters.	171
Subtidal algal ecology of North Queensland reefs with special reference to zonation and seasonality.	172
Giant clam populations.	175
Ecology and migratory pathways of the larvae of commercially important fish and decapod species in the continental shelf zone of the Great Barrier Reef.	205
Life history parameters and reproductive biology of the dugong.	206
Studies on north Queensland fishes.	207
Traditional uses of Marine Resources by Aboriginal Communities on the East Coast of Cape York Peninsula: Stage 1.	220
Engineering properties of coral reefs.	222
Chemical and biological processes associated with oil spills in tropical waters.	231

ORGANIZATION INDEX

James Cook University of North Queensland

Pilot study: National monitoring programme for metals in commercially important shellfish.	232*
Methods for the Re-establishment of Hard Corals in Denuded Reef Systems.	237
Shipping Risk Simulation Study.	239

James Cook University of North Queensland (Subcontract)

Drift card study of Great Barrier Reef surface currents.	14
Man made noise in the ocean.	15
Comparative Structure and Growth of Windward and Leeward Fringing Reefs on Orpheus Island, North Queensland.	47
Geomorphological information on the Continental Shelf, coral reefs and coastline from Fitzroy to Gould Island.	48
Biological basis for managing population of dugongs and other marine mammals in Northern Australia (pilot study).	78
Analysis of visually dominant organisms data from manta tow coral surveys.	151
Hereditary Structure and Genetic Exchange in Coral Populations.	156
Investigation of environmental and biological factors causing morphological variation in reef corals, <i>Pavona cactus</i> and <i>Turbinaria mesenterina</i>	158
Metabolic Studies of the Crown of Thorns Starfish.	159
Year to year variation of recruitment of juvenile hard corals on a reef front.	163
An evaluation of economic and biological aspects of coral collecting in the Great Barrier Reef-Marine Park.	200
History of Crown of Thorns Incidence on the Great Barrier Reef.	226

La Trobe University

Bacterial Populations in the mucus of stressed and non-stressed Staghorn coral <i>Acropora</i> spp.	63
Calcification mechanisms in corals.	120*
Feasibility study, to elucidate the involvement of the neurosecreting system in ionic and osmotic regulation in bristleworms (<i>Eurythoe complanata</i>).	121*
Ionic regulation in marine insects (Hermatobatidae).	122*
Survey of polychlorinated biphenyls (PCBs) in Australian coastal waters.	233

Lizard Island Research Station

Shelf circulation between Lizard Island and Carter Reef, Northern Great Barrier Reef.	21
Taxonomy and ecology of larval and adult fishes.	105
Behaviour, age and growth determinations of larval coral reef fishes.	173*

Marine Research Foundation

Biological investigations at Escape Reef.	174*
--	------

Monash University (Subcontract)

Functional Morphology and Nutrition of the Dugong in relation to its seagrass diet.	79
Genetic variability among geographically isolated nesting populations of <i>Caretta caretta</i>	106

Murdoch University

Taxonomic studies of benthic marine algae.	75
Algal calcification.	123
Ecophysiological and nutritional aspects of symbioses between algae and invertebrates, and between chloroplasts and molluscs.	132
Nutritional and eco-physiological aspects of symbioses between algae and invertebrates.	187

Princess Alexandra Hospital

ORGANIZATION INDEX

University of New England (Subcontract)

Study of the Decision-Making Behaviour of Day Visitors to the Great Barrier Reef Marine Park.	195
--	-----

University of New South Wales

Nutrient Replenishment in Hydrographers Passage.	12
Dynamical study of southern Barrier Reef circulation.	19
Dynamics of the northern Barrier Reef lagoon.	20
Shelf circulation between Lizard Island and Carter Reef, Northern Great Barrier Reef.	21
Tidal flow across Reefs.	22
Pelagic foraminifera in sediments of the continental shelf of eastern Australia.	59*
Structure and physiology of mycorrhizas of plants of coral islands.	70
General biology of the Hairy mussel <i>Trichomya hirsuta</i> (Lamarck).	92*
Reproduction and recruitment of giant clams (Tridacnidae) and dietary preference of larvae of <i>Tridacna</i>	93
Oysters of the Indo-West Pacific region (Bivalvia : Ostreidae and Gryphaeidae).	103
Ecological genetics of <i>Anadara trapezia</i>	125
Stock identification and discrimination of commercially important whittings (Teleostii; Sillaginidae) in Australian waters using genetic criteria.	218

University of Newcastle

Techniques for underwater photogrammetry using simple cameras.	9
---	---

University of Queensland

Modelling the tides of the Coral Seaway.	23
Recruitment, dispersal, and distribution of living sedimentary foraminifers on selected sites of the Great Barrier Reef area.	43
Coastal processes forming and maintaining coral cays of the Great Barrier Reef and their implications for Marine Park Management.	46
Effect of sediment characteristics on beach profiles and surf-zone hydraulics.	60
Impact of coastal engineering works upon coral cays.	61
Interuniversity investigation of sedimentation, water movement and evolution and maintenance of shelf features in northern Great Barrier Reef Province.	62*
Systematics and ecological studies on the algae of the Southern Great Barrier Reef.	77*
Australian synodontidae.	94*
Taxonomy and ecology of benthic invertebrates from Heron Island, Queensland.	102*
Ascidacea of the Great Barrier Reef: Morphological, biological, and chemical bases of inter- and intra- specific relationships.	126
Electrophysiology and behaviour of sponges and anthozoans.	127
Metal complexes in the blood of local ascidians.	128*
Pharmacology and pathology of ciguatera poisoning in mammals and studies on the possible effects of ciguatoxin on fish.	129
Toxinology of certain marine natural products.	130*
Taxonomy and ecology of Scyllaridae, especially <i>Thenus orientalis</i> (Lund) (Crustacea:Decapoda) in northern Great Barrier Reef waters.	177*
Abundance, Schooling Behavior and Population Composition of Sprats (Clupeidae) and Silversides (Atherinidae).	181
Ecological importance of patterning in the emergence of demersal zooplankton.	182
Horizontal distributions of demersal zooplankters as related to type of substratum.	183
Research on biting midges.	184
Prehistoric Aboriginal exploitation of Islands of the central Queensland coast.	194*
Fish ladder design for Queensland coastal streams.	198

University of Queensland (Subcontract)

Bibliographic Database of Coral Reef Molluscs.	1
---	---

ORGANIZATION INDEX

University of Queensland (Subcontract)

Aspects of community dynamics and biology of Scleractinian corals on the Heron Reef crest.	153
---	-----

University of Sydney

Stratigraphy of lagoon sediments - Lady Musgrave Island.	54
Structure and physiology of mycorrhizas of plants of coral islands.	70
Salt and water relations of higher plants of islands of the Great Barrier Reef.	71
Functional morphology and phylogeny of barnacles (Cirripedia).	95
Recruitment of Coral Reef Fishes.	96
Control substances in symbioses between algae and invertebrates.	131
Ecophysiological and nutritional aspects of symbioses between algae and invertebrates, and between chloroplasts and molluscs.	132
Light-harvesting pigment-proteins of algae.	133
Nitrogen fixation on a coral reef.	134*
Prokaryotic algal symbionts on a coral reef.	135
Demographic studies of "Aquarium" reef fish.	185
Demography and population ecology of Pomacentrids.	186
Nutritional and eco-physiological aspects of symbioses between algae and invertebrates.	187
Population ecology of chaetodontid fishes.	188
Recruitment of Herbivorous Reef Fishes.	189
Reef-fish ecology.	190
Role of Detritus in the nitrogen budget of Coral Reef Lagoon.	191
Sexual patterns and competitive interactions in species of labrid genus <i>Thalassoma</i>	192
Structure in Coral Reef Fish communities.	193

University of Sydney (Subcontract)

Annual survey of recruitment of selected reef species in selected habitats on Capricornia Reefs.	152
---	-----

University of Tasmania

Heat Storage and Surface Fluxes of the Coral Sea.	24
--	----

University of Western Australia

Genetic structure of coral populations.	97
--	----

Western Australian Museum

Oysters of the Indo-West Pacific region (Bivalvia : Ostreidae and Gryphaeidae).	103
--	-----
