	APPENDIX. AIMS Hydrographic Data, Shelburne Bay Cruise	31

TABLES

1.	Depth-weighted mean water column concentrations at far northern Great Barrier Reef stations, February 1990	14
2.	Characteristics of shelf sediments in the far northern Great Barrier Reef	15
3.	Depth-weighted mean water column concentrations for depths < 50 metres at Coral Sea stations, February 1990	17
4.	Depth-weighted mean water column concentrations at inshore stations (depth < 20 m) February 1990	17
5.	Depth-weighted mean water column concentrations at outer shelf stations (depth > 20 m), February 1990	18
6.	Depth-weighted mean water column concentrations at shelf stations on the two northern transects, February 1990	18
7.	Depth-weighted mean water column concentrations at stations on the southern transects, February 1990	19
8.	Depth-weighted mean water column concentrations at stations within Temple Bay, February 1990	19
9.	Depth-weighted mean water column concentrations at inshore stations in Shelburne and Lloyd Bays, February 1990	20

10.	Means and standard deviations of depth-weighted mean mixed-layer nutrient and chlorophyll concentrations in the Torres Strait and the Ribbon Reefs	20
11.	Pairwise comparisons (one-way ANOVA) between depth-weighted mean water column nutrient concentrations in the far northern Great Barrier Reef and adjoining waters	21
12.	Chlorophyll standing crops and mid-day hourly water column primary production rates in the far northern Great Barrier Reef and adjacent waters of the Coral Sea	22

FIGURES

1.	Hydrographic station locations in the far northern Great Barrier Reef.....	3
2.	Hydrographic station locations in Temple Bay	4
3.	Light profiles for near-shore stations, < 10 m depth	6
4.	Light profiles for mid-shelf stations, 10-25 m depth.....	7
5.	Light profiles for mid-shelf stations, 25-50 m depth.....	8
6.	Light profiles from stations, 50-100 m depth	23
7.	Grain size characteristics and CaCO ₃ (as % of mud fraction) of shelf sediments in relation to distance from coast	24
8.	Nitrogen and phosphorus content of surficial sediments in relation to distance from coast	25
