

## TABLE OF CONTENTS

<u>Title</u>	<u>Page</u>
1. Introduction	1
2. Classification purpose	4
3. Method	6
1. Classification concepts	6
2. Approaches to land cover classification	7
3. Listing of reef terms	8
4. Results	10
1. Classification design	10
1. Hierarchical component	10
2. Non-hierarchical component	12
3. Categorised entry component	13
2. Coding symbols	14
3. Testing of classification system	15
4. Use of the classification system	17
5. Use of the classification system without the aid of a data recording card	20
6. Retrieval of the classification levels from the recording system	23
5. Discussion	25
6. Conclusion	27
7. Acknowledgements	28
8. References	29

## APPENDICES

I.	Land cover classification concepts.	36
II	a. Listing of reef cover and zonation classifications.	41
	b. Reef cover and zonation classification system for use with remotely sensed Great Barrier Reef data.	42

## FIGURES

Figure 1.	Location of reefs.	2
Figure 2.	The mapping scales for which the GBR classification system is designed.	11
Figure 3.	A classification of reefs (reproduced with permission from Maxwell, 1968).	26

Figure 4.	Reef profiles of the more common reef types showing the physiographic zonation (reproduced with permission from Maxwell, 1968).	65
Figure 5.	Schematic diagram of Unnamed Reef (18°15'S) illustrating zonation (from a photograph by Hopley, 1982).	65

#### TABLES

Table 1.	Systematic use of the classification system.	20
