

TABLE OF CONTENTS

EXECUTIVE SUMMARY.....	i
CONTENTS.....	ii
Tables.....	iii
Figures.....	iv
Acknowledgments	iv
INTRODUCTION.....	1
Persistent Systematic Effects on Abundances.....	2
Survey of <i>Acanthaster planci</i>	3
METHODS	5
Field Methods & Data Processing.....	5
Timing & Reef Selection.....	5
Sampling within reefs	6
Habitats	6
Locations, sites, & transects	6
Taxa Surveyed.....	8
Survey Methods.....	9
Counts of Fish and Large Discrete Benthos	9
Percent Coverage by Benthos and Counts of Small Corals.....	10
Data Processing.....	10
Statistical Methods	11
Preliminary Treatment of Data	11
Hypothesis Testing Approach	11
A posteriori Separation of Effects	12
Spatial Patterns in Mean Abundances	12
Effects of Recent Infestations by <i>A. Planci</i>	13
Effects of Shelf Position, Habitat, and Region.....	13
RESULTS	15
Effects of Recent COTS Outbreaks.....	15
General Effects of <i>A. planci</i>	17
Effects of <i>A. planci</i> Related to Habitat.....	17
Effects of <i>A. planci</i> Related to Region	19
Effects of <i>A. planci</i> Related to Habitat and Region.....	20
Summary	21
Comparison of Counts of <i>A. planci</i> with Data from Manta Tows.....	22
Effects of Habitat	23
General Effects of Habitat.....	23
Effects of Habitat Related to Region.....	25
Effects of Habitat Related to Shelf Position	27
Effects of Habitat Related to Shelf Position and Region.....	29
Summary	31
Effects of Shelf Position	32
General Effects of Shelf Position	32
Effects of Shelf Position Related to Habitat	34
Effects of Shelf Position Related to Region	35
Effects of Shelf Position Related to Habitat and Region.....	36
Summary	38
Differences Among Regions.....	39
General Differences Among Regions.....	39
Differences Among Regions Related to Habitat	39
Differences Among Regions Related to Shelf Position.....	41
Differences Among Regions Related to Habitat and Shelf Position	43
Summary	44

DISCUSSION	46
Abundances of <i>Acanthaster planci</i>	46
Persistent Effects of Past <i>A. planci</i> Outbreaks.....	46
Effects on Fishes.....	46
Effects on Benthos	47
Systematic Spatial Effects.....	47
Effects of Habitat	47
Effects of Shelf Position.....	48
Effects of Region.....	48
Sampling to Represent Reef Status and Large Scale Pattern.....	49
REFERENCES	50
APPENDIX 1: TAXA SURVEYED.....	54
APPENDIX 2: RESULTS OF ANOVAs FOR DENSITIES	59

List of Tables

Table 1: Reefs sampled.....	5
Table 2: Taxa and/or size classes of organisms analysed.	8
Table 3: Structure of ANOVAs of COTS effects on abundances.....	13
Table 4: Structure of ANOVAs of Shelf Position, Habitat, & Region effects.....	14
Table 5: Summary results of ANOVAs of COTS effects	15
Table 6: Counts of <i>A. planci</i> from underwater visual searches & manta tow surveys.....	22
Table 7: Summary results ANOVAs of Shelf Position, Habitat, & Region effects	23
Table A1.1: Taxa and size classes counted on at least one belt transect of each size	54
Table A1.2: Taxa or substrata encountered under line intercept transects	55
Table A2.1: Results of ANOVAs of <i>A. planci</i> effects on mid-shelf reefs	59
Table A2.2: Results of ANOVA of Shelf Position, Region, & Habitat effects.....	63
Table A2.3: Taxa for which variance among reefs within region & COTS history was non-trivial	70
Table A2.4: Taxa for which variance among reefs within region & shelf position was non-trivial.	71

List of Figures

Figure 1: Sampling locations within reefs.....	5
Figure 2: Main effects of recent <i>A. planci</i> infestations.	17
Figure 3: Interactions of COTS & Habitat effects.	18
Figure 4: Interactions of COTS & Region effects on fishes.....	19
Figure 5: Interactions of COTS & Region effects on corals.	20
Figure 6: Interactions of COTS, Habitat, & Region effects on <i>Plectropomus</i> spp. and <i>Tridacna</i> spp.....	21
Figure 7: Main effects of Habitat.....	25
Figure 8: Habitat comparisons by Region for fishes.	25
Figure 9: Habitat comparisons by Region for benthos.....	26
Figure 10: Habitat comparisons by Shelf Position for fishes.	27
Figure 11: Habitat comparisons by Shelf Position for benthos.....	28
Figure 12: Habitat comparisons by Region & Shelf Position for pocilloporid corals.....	29
Figure 13: Habitat comparisons by Region & Shelf Position where back-reefs > front-reefs.....	29
Figure 14: Habitat comparisons by Region & Shelf Position where effects changed with Shelf Position.	31
Figure 15: Main effects of Shelf Position.	32
Figure 16: Shelf Position comparisons by Region or Habitat where mid-shelf > outer-shelf.	32
Figure 17: Shelf Position comparisons by Region or Habitat where outer-shelf > mid-shelf.	33
Figure 18: Shelf Position comparisons by Habitat where effects of Shelf Position varied with Habitat.....	34
Figure 19: Shelf Position comparisons by Habitat or Region where Shelf Position effects reversed.	35
Figure 20: Shelf Position comparisons by Region for corals.	36
Figure 21: Shelf Position comparisons by Region & Habitat where outer-shelf \geq mid-shelf.....	36
Figure 22: Shelf Position comparisons by Region & Habitat where mid-shelf \geq outer-shelf.....	37
Figure 23: Shelf Position comparisons by Region & Habitat where Shelf Position effects reversed.....	38
Figure 24: Main effects of Region	39
Figure 25: Regional comparisons by Habitat.....	40
Figure 26: Regional comparisons by Shelf Position where Region effects were on outer-shelf reefs.....	41
Figure 27: Regional comparisons by Shelf Position where Region effects were on mid-shelf reefs.....	42
Figure 28: Regional comparisons by Habitat & Shelf Position where abundances declined north \rightarrow south.	43
Figure 29: Regional comparisons by Habitat & Shelf Position where north \rightarrow south. trends varied.....	44
Figure 30: Regional comparisons by Habitat & Shelf Position where Region effects were highly variable.....	45

Acknowledgements

The work presented in this report stems from a great deal of effort by many people. Rob Van Woelik, Robyn Cumming, Richard Birdsey, Ian Butler, Jim Higgs, Brian Cohen, Ian Roderick, Stewart Cairns, and Rachel Webb all participated in field work and data entry. Kerry Bell and Linda Axe also helped with data entry. Terry Ford and Louis Wilson kept the RV Sunbird running and ensured that the work got done. Avril, Xenica, & Bliss Ayling put up with Tony's long absences in the field. Gina Mercer and Lucy supported Bruce through too many late nights and weekends at work to finish the report. Our thanks to you. The work was funded by the Great Barrier Reef Marine Park Authority and the Crown of Thorns Starfish Research Committee. Bruce Mapstone was supported in the earlier stages by a National Research Fellowship.
