

## TABLE OF CONTENTS

EXECUTIVE SUMMARY.....	i
CONTENTS.....	ii
Tables.....	iii
Figures.....	iii
Acknowledgments .....	iii
INTRODUCTION.....	1
A General Monitoring Protocol for the GBR.....	1
Random Variances & Sampling Designs.....	2
METHODS .....	5
Field Methods & Data Processing.....	5
Timing & Reef Selection .....	5
Sampling within reefs .....	6
Habitats .....	6
Locations, sites, & transects .....	6
Taxa Surveyed.....	8
Survey Methods.....	9
Counts of Fish and Large Discrete Benthos .....	9
Percent Coverage by Benthos and Counts of Small Corals.....	10
Data Processing .....	10
Statistical Methods .....	11
Preliminary Screening of Data.....	11
Estimation of Variance Components.....	11
Systematic Patterns in Variation .....	12
Hypothesis Testing .....	14
<i>A posteriori Separation of Effects</i> .....	15
Estimation of Sample Sizes.....	15
<i>Cost-Benefit Procedures</i> .....	15
<i>Sample Sizes to Detect Specific Effects</i> .....	18
Effects of Incomplete Sampling within Reefs.....	20
RESULTS .....	21
Scale Related Components of Variation.....	21
Spatial patterns in Coefficients of Variation .....	22
Estimation of Sampling Requirements.....	29
<i>Allocation of Sampling Effort Within Reefs</i> .....	29
<i>Numbers of Reefs or Locations to be Sampled</i> .....	33
Location Specific Patterns Among Reefs .....	40
DISCUSSION .....	43
Scales of Variation .....	43
Predictions of Future Sampling Requirements.....	44
<i>Sub-sampling Reefs</i> .....	44
<i>Replication of Experimental Units</i> .....	45
Sampling to Represent Reef Status and Large Scale Pattern .....	46
Future Directions .....	46
REFERENCES.....	48
APPENDIX 1: TAXA SURVEYED .....	57
APPENDIX 2: RESULTS OF ANOVAs FOR CVs.....	62

## List of Tables

<b>Table 1:</b> Reefs sampled.....	5
<b>Table 2:</b> Taxa and/or size classes of organisms analysed.....	8
<b>Table 3:</b> Variance estimation formulae and sample sizes.....	12
<b>Table 4:</b> Structure of ANOVAs of CVs.....	14
<b>Table 5:</b> Summary results of ANOVAs of CVs.....	22
<b>Table 6:</b> Optimum allocations of effort to locations, sites, & transects within reefs.....	30
<b>Table 7:</b> Predicted numbers of reefs to be sampled.....	34
<b>Table 8:</b> Detectable Effects at $\alpha=\beta=0.10$ when sampling 4 reefs.....	36
<b>Table 9:</b> Predicted numbers of control locations required to detect 50% impact.....	38
<b>Table 10:</b> Detectable differences between single impact & 4 control locations.....	39
<b>Table 11:</b> Results of ANOVAs of location effects on spatial patterns among reefs.....	40
<b>Table 12:</b> <i>A posteriori</i> patterns among Shelf Position & Region which depended on location sampled.....	42
<b>Table A1.1:</b> Taxa and size classes counted on at least one belt transect of each size.....	57
<b>Table A1.2:</b> Taxa or substrata encountered under line intercept transects.....	58
<b>Table A2.1:</b> Results of ANOVAs of Habitat, Shelf Position, & Region effects on $CV_r$ for fishes.....	62
<b>Table A2.2:</b> Results of ANOVAs of Habitat, Shelf Position, & Region effects $CV_b$ , $CV_s$ , & $CV_r$ for fishes.....	65
<b>Table A2.3:</b> Results of ANOVAs of Habitat, Shelf Position, & Region effects on $CV_r$ for benthos.....	68
<b>Table A2.4:</b> Results of ANOVAs of Habitat, Shelf Position, & Region effects $CV_b$ , $CV_s$ , & $CV_r$ for benthos.....	71

## List of Figures

<b>Figure 1:</b> Sampling locations within reefs.....	7
<b>Figure 2:</b> Flow diagram for cost-benefit calculations.....	17
<b>Figure 3:</b> Mean Coefficients of Variation at each scale.....	21
<b>Figure 4:</b> Interactions of Habitat & Region effects on $CV_s$ .....	23
<b>Figure 5:</b> Main effects of Habitat ( <i>A</i> ), Shelf Position ( <i>B</i> ), and Region ( <i>C</i> ) on $CV_r$ & $CV_r$ .....	24
<b>Figure 6:</b> Interactions of Habitat & Region effects on $CV_r$ & $CV_r$ .....	26
<b>Figure 7:</b> Interactions of Shelf Position & Region affects on $CV_r$ & $CV_r$ .....	27
<b>Figure 8:</b> Interactions of Shelf Position & Habitat effects on $CV_r$ .....	28

## Acknowledgements

The work presented in this report stems from a great deal of effort by many people. Rob Van Woesik, Robyn Cumming, Richard Birdsey, Ian Butler, Jim Higgs, Brian Cohen, Ian Roderick, Stewart Cairns, and Rachel Webb all participated in field work and data entry. Kerry Bell and Linda Axe also helped with data entry. Terry Ford and Louis Wilson kept the RV Sunbird running and ensured that the work got done. Avril, Xenica, & Bliss Ayling put up with Tony's long absences in the field. Gina Mercer and Lucy supported Bruce through too many late nights and weekends at work to finish the report. Our thanks to you. The work was funded by the Great Barrier Reef Marine Park Authority and the Crown of Thorns Starfish Research Committee. Bruce Mapstone was supported in the earlier stages by a National Research Fellowship.
