EXECUTIVE SUMMARY	1
RECOMMENDATIONS	2
INTRODUCTION	5
METHODS	5
Survey methodology	6
Correction factors	6
Analysis	7
RESULTS	7
Group size and Composition	7
Southern Great Barrier Reef	7
Hervey Bay region	7
Population and density estimates	7
Southern Great Barrier Reef	8
Hervey Bay region	8
Differences between surveys	8
Southern Great Barrier Reef	8
Hervey Bay	9
DISCUSSION	9
Significance of differences between surveys	9
Possible causes of the decline in dugong numbers	11
Loss of seagrass due to coastal development	11
Indigenous hunting	12
Incidental catch by fishing operations	13
Options for management	14
Habitat protection	15
Indigenous hunting	16
Gill-netting	16
Priorities for research	19
Can we evaluate the relative impact of different threatening processes?	19
Habitat status	20
Gill-netting	20
Indigenous hunting	20
Movements of dugongs	20
Conclusions	21
ACKNOWLEDGMENTS	21
REFERENCES	21
APPENDIX	58

TABLES

1.	Weather conditions encountered during the survey	25
2.	Areas of survey blocks and sampling intensities	26
3.	Details of group size estimates and correction factors used in the population estimates for dugongs in the 1994 survey of southern Great Barrier Reef Marine Park and Hervey Bay	27
4a.	Estimates of dugong numbers for each survey block in the southern Great Barrier Reef Marine Park and in Hervey Bay in three aerial surveys	28
4b.	Estimates of dugong densities for each survey block in the southern Great Barrier Reef Marine Park and in Hervey Bay in three aerial surveys	29
5.	Summary of analysis of variance comparing observed dugong density in the southern GBR in 1986/87, 1992 and 1994.....	30
6.	Summary of analysis of variance comparing observed dugong density in the southern GBR in 1986/87, 1992 and 1994 (without Beaufort sea state as a covariate).....	30
7.	Details of shark nets set for bather protection in GBR region	30

FIGURES

1a.	The transect lines in blocks (1-8) flown in November 1994 in the inshore waters of the Mackay-Capricorn section of the Great Barrier Reef Marine Park.....	32
1b.	The transect lines in block (1-11) flown in November 1994 in the inshore waters of the Central Section of the Great Barrier Reef Marine Park	34
2.	The transect lines flown in November 1994 in the inshore waters of Hervey Bay and the Great Sandy Straits	36
3a.	The numbers of groups of dugongs in the Great Barrier Reef Marine Park of various sizes with calves and without calves	38
3b.	The numbers of groups of dugongs in Hervey Bay and the Great Sandy Straits of various sizes with and without calves	40
4a.	Dugong density in the inshore waters of the Mackay-Capricorn Section of the Great Barrier Reef Marine Park in November 1994 calculated on a 5 x 5 nm square grid and adjusted for sampling intensity	42
4b.	A comparison of the presence and absence of dugong sightings within a 5 x 5 nm square grid in the inshore waters of the Mackay-Capricorn Section of the Great Barrier Reef Marine Park in 1986 and 1994.....	44

4c.	Protection of dugong habitats in the inshore waters of the Mackay-Capricorn Section of the Great Barrier Reef Marine Park	46
5a.	Dugong density in the inshore waters of the Central Section of the Great Barrier Reef Marine Park in November 1994 calculated on a 5 x 5 nm square grid and adjusted for sampling intensity	48
5b.	A comparison of the presence and absence of dugong sightings within a 5 x 5 nm square grid in the inshore waters of the Central Section of the Great Barrier Reef Marine Park in 1987 and 1994	50
5c.	Protection of dugong habitats in the inshore waters of the Central Section of the Great Barrier Reef Marine Park.....	52
6.	The mean density of dugongs/km ² in each block in 1986/87 and 1994	54
7.	Protection of seagrass habitat in the Great Barrier Reef Marine Park	56
