

Risk factor	Main origin	Effectiveness of protection and management measures						Overall risk	
		Context	Planning	Inputs	Processes	Outputs	Outcomes		
Climate change*	Global								
Catchment runoff (water quality)	Great Barrier Reef catchment								
Direct use – extractive	Great Barrier Reef Region	Fishing							
		Traditional use (some)							
		Scientific research (some)							
Coastal development	Great Barrier Reef catchment								
Direct use – non-extractive	Great Barrier Reef Region	Traditional use (some)							
		Recreation (not including fishing)							
		Ports and shipping							
		Commercial marine tourism							
		Defence							
		Scientific research (some)							
		Management effectiveness				Level of risk			
		Very good	Good	Poor	Very poor	Very high	High	Medium	Low
