

LIKELIHOOD									
Rare	Unlikely		Possible		Likely		Almost certain		Catastrophic
						Sea level rise	Sea temperature increase	Ocean acidification	
	Altered ocean currents	Fishing herbivores		COTS outbreak		Bycatch of species of conservation concern	Nutrient runoff	Pesticide runoff	Major
	Large oil spill	Large chemical spill						Fishing top predators	
		Exotic species - imported bait	Altered cyclone activity	Grounding large vessels	Poaching species of conservation concern	Marine debris	Illegal fishing	Sediment runoff	Moderate
			Exotic species - hull fouling	Exotic species - ballast water		Fishing spawning aggregations		Death of discarded catch	
				Exotic species - aquaculture				Clearing coastal habitats	
			Coral disease outbreak	Drupella outbreak	Traditional hunting	Boat strike	Barriers to river flow	Vessel waste discharge	Minor
						Dredging and spoil dumping	Anchoring on coral	Fishing low order predators	
							Fishing filter feeders	Fishing detritivores	
								Physical fishing impacts	Insignificant
						Grounding small vessels	Small chemical spill	Small oil spill	
								Snorkelling and diving	
LEVEL OF RISK									
	Low	Medium	High	Very high
